

Dear Valued Customer,

When combining a white or light color fabric with a dark color fabric, there is a risk of color transference or color bleed. Our customers need to know that this common industry problem can become obvious under certain conditions. Please be advised that perspiration, deodorants, lotions, and perfumes could contribute to quality issues. It is difficult for us to guarantee that even by following the proper washing instructions you'll avoid color transference or color bleeding. We have been a leader in performance apparel for 35 years and outfit Olympians around the world. It is important for us to continue our reputation for the best quality in the world and alert you to our concern.

The following is a list of fabrics that may be more of a risk than others when combined with white or light fabrics:

- Berry Mystique
- Black Mystique
- Navy Mystique
- Red Mystique
- Merlot Mystique

Please use your own discretion when ordering apparel combining light and dark colors. We will not guarantee that certain fabric combinations are safe from color bleed. You are free to order any fabric, color, and combination. We have customers that order light and dark combinations at their own risk. If you choose to do so, we ask that you sign below indicating that GK Elite Sportswear will not be responsible for replacing or repairing the garments.

Thank you for your business!

Sincerely,

Quality Control Department
